

# REPAIR SLEEVE

The Swedfan Repair Sleeve is a fast and secure tool for repairing holes and tears of flexible ducting. The sleeve is made from standard duct material and a longitudinal zipper for closing the sleeve. The sleeve is made approx. 0.5% smaller than the nominal duct diameter which will allow the sleeve to be really tight against the duct once the duct is pressurized. With the repair sleeve, the repair will be professionally done and the leakage from any hole will be reduced to a minimum.

The repair sleeves are manufactured in standard lengths 1.0, 2.0, 3.0 and 5.0 m. Other lengths will be manufactured upon request.
